

## Table of Contents

### Editorial

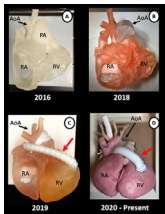

- 1 Editor's Introduction**  
*Glen S. Van Arsdell*

### Advancing Techniques

- 2 Williams Syndrome: Supravalvar Aortic, Aortic Arch, Coronary and Pulmonary Arteries: Is Comprehensive Repair Advisable and Achievable?**  
*Michael Ma, Elisabeth Martin, Claudia Algaze, Ronnie Thomas Collins, Doff McElhinney, Richard Mainwaring, and Frank Hanley*

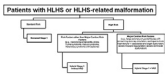

- 9 Training on Congenital 3D Cardiac Models – Will Models Improve Surgical Performance?**  
*David J Barron, Nabil Hussein, and Shi-Joon Yoo*

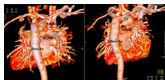

- 18 How to Start a Lymphatic Program**  
*Mohamed Ali H. Ghandour and Sanjay P. Sinha*

### Improving Applications

- 26 Support with Single Ventricle-Ventricular Assist Device (sVAD) in Patients with Functionally Univentricular Circulation Prior to Fontan Operation**  
*Mark S. Bleiweis, Joseph Philip, James C. Fudge, Himesh V. Vyas, Giles J. Peek, Andrew D. Pitkin, Gregory M. Janelle, Kevin J. Sullivan, Yuriy Stukov, Connie S. Nixon, Omar M. Sharaf, Dan Neal, and Jeffrey P. Jacobs*

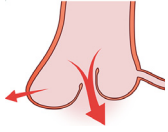

- 40 Hybrid First-stage Palliation and Other Strategies to Achieve Biventricular Repair in High-Risk Neonates With Complex Heart Anomalies and Aortic Arch Obstruction**  
*Bahaaldin Alsoufi*

- 50 The Ross Procedure in Adolescence and Beyond: Are There Still Contraindications?**  
*Ismail El-Hamamsy, Charles Laurin, and Elbert E. Williams*

# Table of Contents

---

## 56 Congenital Aortic Valve Repair When the Options aren't Good: Truncus Arteriosus and Transposition of the Great Arteries

*Igor E. Konstantinov, Christian P. Brizard, and Edward Buratto*

### Vexing Topics

## 63 Toward More Granular Guidelines in AAOCA: Associating Anatomical Details With Specific Surgical Strategies

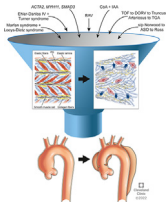

*Anusha Jegatheeswaran and William M. DeCampli*

## 75 Infant Mitral Valve Replacement: Current State of the Art

*David M. Overman, Francis X. Moga, Elizabeth H. Stephens, Joseph A. Dearani, and Robroy H. MacIver*

### Advances in Complex Adult Congenital Heart Disease

## 81 Strategies for Complex Reoperative Aortic Arch Reconstruction in Patients With Congenital Heart Disease

*William C. Frankel and Eric E. Roselli*

## 89 Catheter-based Interventions to Reduce or Modify Surgical Risk in High-Risk Adult Congenital Heart Disease Patients

*Weiyi Tan and Jamil Aboulhosn*
